PROJECTS

Foodie Application

NIIT

04/2023 - 05/2023

- The user can conveniently order food online from their favorite restaurant by registering themselves in the database.
- For enhanced security, we have implemented JSON Web Token (JWT) to ensure that only authorized individuals can access our application.

Spotify me

NIIT

03/2023 - 04/2023

Efficiently designed using Angular and Spring Boot, this application serves as a Spotify clone, allowing users to:

- Seamlessly play songs.
- Create personalized playlists.
- Dynamically add and remove songs from playlists.
- Instantly play songs from created playlists.

Weather Application

NIIT

06/2023 - 06/2023

This is a real-time weather application that enables users to promptly access precise weather information for their city.

- The application utilizes the Open Weather API to provide users with up-to-the minute weather updates.
